FROM THE HELM

DBMS is a non-profit organization that's mission is rooted in making the bay accessible, and to instill an enduring love for the sea among students. The school was founded in 1997 by a group of Duxbury residents who had the vision to turn the last remaining waterfront property in Duxbury into a community maritime school that provides safe and enriching programs and access to Duxbury Bay, our greatest and most beautiful natural resource.

Now beginning its nineteenth year, DBMS has become a model for other community maritime schools around the country. Our programs offer students a chance to test themselves through the wonders and adventures they encounter on Duxbury Bay. The school's programs, spanning all ages, include sailing, rowing, windsurfing, stand up paddleboarding, kayaking, powerboating, and marine ecology. The school also hosts a variety of different events (public and private) in our upstairs venue, Clifford Hall. Whether you are a novice mariner, experienced sailor, or just enthusiastic about getting out on the bay, DBMS has something for everyone!

Why you should take a class at DBMS!

The basic premise of our programs remains the same. The experiential learning that occurs on Duxbury Bay provides valuable life lessons for young and old alike. Learning from the sea develops self-reliance, fortitude, responsibility, teamwork, sportsmanship and an appreciation for nature. Most importantly, this all happens while having fun!

Don't miss the boat - register now online at www.dbms.org!

THANK YOU!

Chuck Leonard, DBMS Executive Director
